lcl023@princeton.edu | (424)-552-0393

Education:

Princeton University, Princeton, NJ — Expected May 2027

- A.B. in Neuroscience
- Minor in Statistics and Machine Learning
- Cumulative GPA: 3.947
- Relevant Coursework: NEU350 (Laboratory in Principles of Neuroscience), COS435 (Reinforcement Learning), ORF245 (Fundamentals of Statistics), ORF309 (Probability and Stochastic Systems)

Awards/Grants:

Boyce Batey Senior Thesis Award — June 2026

- Received a $1,500 grant from the Princeton Neuroscience Institute to perform research on-campus over the 2026 summer break
- Selected as the sole recipient of the award

Office of Undergraduate Research Student Initiated Internship Program (OURSIP) — June 2025 - July 2025

- Received a $6,570 grant to perform research on-campus over the 2025 summer break through the Niv Lab
- One out of ~40 students to receive award
- Utilized grant funds to initiate project on the effect of planning costs on goal persistence
- Attended weekly Summer Research Colloquium meetings to improve research skills

Research Experience:

Undergraduate Research Assistant, **Niv Lab (Princeton Mental Health Lab)**,
Princeton, NJ — September 2024 - Present

- Research reward and goal-setting using Reinforcement Learning (RL) algorithms under the supervision of graduate student Branson Byers
- Engage in lab meeting discussions on current and relevant computational and cognitive neuroscience research literature to gain a deeper understanding of the field and inspiration for future research
- Investigating whether people are sensitive to the cost of planning that comes with switching between goals

Presentations:

Poster, **"An Investigation into the Effect of Planning Costs in Goal Perseverance"**
Princeton Neuroscience Institute Summer Research Showcase — July 31, 2025

Princeton Summer Research Colloquium Conference — July 31, 2025
Princeton, NJ

- Presented preliminary findings gathered during the summer research internship during poster sessions attended by 60+ students and faculty

Poster, **"Switch or Stay? Accumulation, Momentum, and Opportunity Cost in Goal Progress."**
Princeton Research Day — May 8, 2025

- Shared findings during poster session attended by 200+ students and faculty
- Recorded and uploaded 3-minute video explaining my project, directed towards a general audience

Skills:

Python (Intermediate), Java (Intermediate), Javascript (Beginner), EEG (Data Analysis), fMRI (Data Analysis), HIPAA (Training), IRB (Training)
