Luke Cho

lcl023@princeton.edu | (424) 552-0393

Education:

Princeton University, Princeton, NJ — Expected May 2027

- A.B. in Neuroscience
- Minor in Statistics and Machine Learning
- GPA: 3.961
- Relevant Coursework: NEU350 (Laboratory in Principles of Neuroscience), COS435 (Reinforcement Learning), ORF245 (Fundamentals of Statistics), ORF309 (Probability and Stochastic Systems)

Research Experience:

Undergraduate Research Assistant, **Niv Lab (Princeton Mental Health Lab)** — September 2024 - Present
Princeton, NJ

- Investigate reward and goal-setting using reinforcement learning (RL) models under the supervision of graduate student Branson Byers
- Initiated a research project investigating whether people are sensitive to planning costs associated with switching between goals
- Presented preliminary findings from current project during a weekly lab meeting

Awards/Grants:

Boyce Batey Senior Thesis Award — June 2026

- Received a $1,500 grant from the Princeton Neuroscience Institute to perform research on campus during summer 2026
- Selected as the sole recipient of the award

Office of Undergraduate Research Student Initiated Internship Program (OURSIP) — June 2025 - July 2025

- Received a $6,570 grant to perform research on-campus during summer 2025 through the Niv Lab
- Selected as one of approximately 40 recipients
- Utilized grant funds to initiate project investigating on the effect of planning costs on goal persistence

Presentations:

Poster, **"An Investigation into the Effect of Planning Costs in Goal Perseverance"**
Computational Cognitive Neuroscience (CCN) Conference — August 5, 2026
New York, NY
Princeton Neuroscience Institute Summer Research Showcase — July 30, 2026
Princeton, NJ
Cognitive Science (CogSci) Conference — July 24, 2026
Rio de Janeiro, Brazil
Princeton Neuroscience Institute Summer Research Showcase — July 31, 2025
Princeton, NJ
Princeton Summer Research Colloquium Conference — July 31, 2025
Princeton, NJ

Poster, **"Switch or Stay? Accumulation, Momentum, and Opportunity Cost in Goal Progress"**
Princeton Research Day — May 8, 2025
Princeton, NJ

Skills:

Programming: Python, Java, JavaScript
Neuroimaging/Neurophysiology: EEG data analysis, fMRI data analysis
Research Compliance: HIPAA, IRB training
